EXPERIENCE

Full Stack Developer

microverse

📅 03/2023 - Present 📍 SF, CA · Remote

- Developed fullstack projects with React and Ruby, refining testing and maintenance. Resulted in a 30% reduction in project timelines, highlighting efficiency improvements.
- Collaborate through pair programming, following agile methodology and Git workflow for effective teamwork and development.
- Mentored fresh developers weekly, providing technical support through code reviews.

Software Developer Intern

scandiweb

📅 10/2021 - 02/2022 📍 Lativa - Remote

- Developed and implemented user interfaces, responsive layouts, and backend integrations for web projects.
- Expanded technical skills in PHP, Magento, and React. Took responsibility for establishing new extensions on Magento.

PROJECTS

Countries Weather

🔗 <https://github.com/ybadr99/countries-weather>

Country Weather: A React project displaying current weather conditions worldwide. Users can search for a country to view temperature, humidity, wind speed, and more.

Blog App

🔗 <https://github.com/ybadr99/blog-app>

A Ruby on Rails web app for creating, publishing, and managing blog posts. Provides authors an intuitive interface to share stories, engage with readers, and allows comments and likes.
